Volume Contents

Volume 13 Number 1

S. K. KAUL	1	A semi-dynamical system associated with a general control system
J. TURO	7	A boundary value problem for hyperbolic systems of differential-functional equations
E. N. DANCER	19	A counterexample to the Lazer–McKenna conjecture
A. FAVINI and P. PLAZZI	23	On some abstract degenerate problems of parabolic type—2. The nonlinear case
C. CORTAZAR and M. ELGUETA	33	Localization and boundedness of the solutions of the Neumann problem for a filtration equation
J. DUVALLET	43	A theorem of existence for discontinuous differential systems with two point boundary conditions
A. F. ACKER and B. KAWOHL	53	Remarks on quenching
J. TSINIAS	63	A Lyapunov description of stability in control systems
S. HU and V. LAKSHMIKANTHAM	75	Periodic boundary value problems for second order impulsive differential systems
Z. NANIEWICZ	87	On some nonconvex variational problems related to hemivariational inequalities
SOFTWARE SURVEY SECTION	I	

Volume 13 Number 2

CHEN YUNMEI	101	The life span of the solutions to Cauchy problems for nonlinear wave equations
J. M. BORWEIN and H. M. STROJWAS	125	The hypertangent cone
SHEN ZUHE	145	On the periodic solution to the Newtonian equation of motion
A. CAPOZZI, D. LUPO and S. SOLIMINI	151	On the existence of a nontrivial solution to nonlinear problems at resonance
J. M. RAKOTOSON	165	On some degenerate and nondegenerate quasilinear elliptic systems with nonhomogeneous Dirichlet boundary condition
A. ALVINO, G. TROMBETTI and P. L. LIONS	185	On optimization problems with prescribed rearrangements
SOFTWARE SURVEY SECTION	I	

Volume 13 Number 3

K. P. R. SASTRY, S. V. R. NAIDU and J. R. PRASAD	221	Common fixed points for multimaps in a metric space
A. STAHEL	231	Hyperbolic initial boundary value problems with nonlinear boundary conditions
T. KACZYNSKI and V. ZEIDAN	259	An application of Ky-Fan fixed point theorem to an optimization problem
S. AHMAD and A. C. LAZER	263	Asymptotic behaviour of solutions of periodic competition diffusion system
R. P. GILBERT and WEN GUO-CHUN	285	Free boundary problems occurring in planar fluid dynamics
P. CANNARSA and H. M. SONER	305	Generalized one-sided estimates for solutions of Hamilton–Jacobi equations and applications
J. A. GOLDSTEIN, S. ÔHARU and T. TAKAHASHI	325	Semilinear Hille–Yosida theory: the approximation theorem and groups of operators
NGUYÊN PHUONG CÁC	341	On the number of solutions of an elliptic boundary value problem with jumping nonlinearity
SOFTWARE SURVEY SECTION	I	

Volume 13 Number 4

DONG ZHANG	353	On multiple solutions of $\Delta u + \lambda u + \|u\|^{4/(n-2)}u = 0$
L. BOCCARDO, F. MURAT and J.-P. PUEL	373	Existence results for some quasilinear parabolic equations
YONG-ZHUO CHEN	393	The generalized degree for compact perturbations of m-accretive operators and applications
R. RICCI and D. A. TARZIA	405	Asymptotic behavior of the solutions of the dead-core problem
J. W. NEUBERGER	413	Constructive variational methods for differential equations

P. TRACQUI, J. F. STAUB and A. M. PERAULT-STAUB 429 Analysis of degenerate Hopf bifurcations for a nonlinear model of calcium metabolism

L. WHITE and J. T. ODEN 459 Dynamics and control of viscoelastic solids with contact and friction effects

SOFTWARE SURVEY SECTION I

Volume 13 Number 5

G. CICOGNA and G. GAETA 475 Periodic solutions from symmetry

M. S. DREW, S. C. KLOSTER and J. D. GEGENBERG 489 Lie group analysis and similarity solutions for the equation $\frac{\partial^2 u}{\partial x^2} + \frac{\partial^2 u}{\partial y^2} + \frac{\partial^2 (e^u)}{\partial z^2} = 0$

H. IKEDA, M. MIMURA and Y. NISHIURA 507 Global bifurcation phenomena of travelling wave solutions for some bistable reaction–diffusion systems

KUNG-CHING CHANG 527 On the periodic nonlinearity and the multiplicity of solutions

S. RĂDULESCU and M. RĂDULESCU 539 Global univalence and global inversion theorems in Banach spaces

M. NAKAO 555 On some regularity of periodic solutions of the wave equation with a nonlinear or degenerate dissipative term

A. HARAUX 565 A remark on Hölder continuity of periodic solutions to some nonlinear wave equations

V. H. MOLL 569 A note on McKean's caricature for nerve conduction

J.-F. LEON and G. TARANTELLO 579 Breaking of symmetry for a minimization problem

YUAN JIANCHENG 589 Necessary and sufficient conditions for existence of periodic solutions of n-dimensional dynamical systems

SOFTWARE SURVEY SECTION I

Volume 13 Number 6

N. HIRANO	599	Nonlinear evolution equations with nonmonotonic perturbations
M. A. HERRERO	611	A limit case in nonlinear diffusion
J.-P. PENOT	629	Metric regularity, openness and Lipschitzian behavior of multifunctions
M. S. MOULAY and M. PIERRE	645	Regularizing effect for a nonlinear diffusion with irregular source-term
S. ELAYDI and S. K. KAUL	657	Asymptotic stability in general dynamical systems
H. EGNELL, F. PACELLA and M. TRICARICO	671	Some remarks on Sobolev inequalities
J. SANTANILLA	683	Solvability of a nonlinear boundary value problem without Landesman–Lazer condition
N. HIRANO	695	Existence of nontrivial solutions of semilinear elliptic equations
F. GIANNONI	707	Periodic solutions of dynamical systems by a saddle point theorem of Rabinowitz
J.-B. HIRIART-URRUTY and A. SEEGER	721	Calculus rules on a new set—valued second order derivative for convex functions
SOFTWARE SURVEY SECTION	I	

Volume 13 Number 7

I. GYÖRI	739	Existence and growth of oscillatory solutions of first order unstable type delay differential equations
A. ÜNAL	753	An algebraic criterion for the onset of chaos in nonlinear dynamical systems
J. M. FRAILE and J. C. SABINA	767	General conditions for the existence of a "critical point–periodic wave front" connection for reaction–diffusion systems
J. HENRY and B. LOURO	787	Singular perturbation theory applied to the electrochemistry equations in the case of electroneutrality

R. R. AKHMEROV 803 On periodic travelling waves of equations with viscosity coefficient of variable sign

V. LAKSHMIKANTHAM and XINZHI LIU 819 On quasi stability for impulsive differential systems

HUANG ZHENG MING 829 A necessary and sufficient condition for the existence of a solution to an operator equation

U. LEDZEWICZ-KOWALEWSKA 833 A necessary and sufficient condition for Altman's maximal element problem for constraint sets with many equalities

J. HULSHOF, D. TERMAN and F. VERHULST 841 Existence of stationary solutions in the coronal loop problem

C. MARTÍNEZ-YÃNEZ 857 A fixed point theorem on k-uniformly rotund spaces

R. SINE 863 Hyperconvexity and approximate fixed points

R. CHIAPPINELLI 871 On spectral asymptotics and bifurcation for elliptic operators with odd superlinear term

SOFTWARE SURVEY SECTION I

Volume 13 Number 8

MOHAMMED GUEDDA and LAURENT VERON 879 Quasilinear elliptic equations involving critical Sobolev exponents

P. J. RABIER 903 Generalized Jordan chains and two bifurcation theorems of Krasnoselskii

A. KLARBRING, A. MIKELIC, and M. SHILLOR 935 On friction problems with normal compliance

R. MICHALEK 957 A $\mathbb{Z}^p$ Borsuk-Ulam theorem and index theory with a multiplicity result in partial differential equations

S. TOTARO 969 Mutual shading effect on algal distribution: a nonlinear problem

A. Bressan and A. Cortesi 987 Directionally continuous selections in Banach spaces

H. I. Freedman and Y. Takeuchi 993 Global stability and predator dynamics in a model of prey dispersal in a patchy environment

Software Survey Section I

Volume 13 Number 9

L. Qi 1003 The maximal normal operator space and integration of subdifferentials of nonconvex functions

F. A. Howes and S. Shao 1013 Asymptotic analysis of model problems for a coupled system

P. Fabrie 1025 Regularity of the solution of Darcy–Forchheimer's equation

M. Tsutsumi 1051 On smooth solutions to the initial-boundary value problem for the nonlinear Schrödinger equation in two space dimensions

I. Mandhyan 1057 Examples of global normal forms for some simple nonlinear integral operators

E. N. Barron and H. Ishii 1067 The Bellman equation for minimizing the maximum cost

A.-K. Drangeid 1091 The principle of linearized stability for quasilinear parabolic evolution equations

J. Da Silva Ferreira 1115 Asymptotic behavior of the solutions of a nonlinear system of Klein–Gordon equations

Software Survey Section I

Volume 13 Number 10

Primo Brandi and Anna Salvadori 1127 On the nonparametric integral over a BV surface

J. Q. Liu 1139 Nonlinear vibration of a beam

Pierluigi Colli 1149 On a nonlinear and nonlocal evolution equation related to muscle contraction

HIROYUKI USAMI	1163	On a singular elliptic boundary value problem in a ball
GIOVANNI VIDOSSICH	1171	On the solvability of boundary value problems for higher order ordinary differential equations
V. LAKSHMIKANTHAM and XINZHI LIU	1181	On asymptotic stability for nonautonomous differential systems
NOBOYUKI KENMOCHI and IRENA PAWLOW	1191	Asymptotic behaviour of solutions to parabolic–elliptic variational inequalities
B. H. GILDING	1215	Localization of solutions of a nonlinear Fokker–Planck equation with Dirichlet boundary conditions
OLIVIER REY	1241	A multiplicity result for a variational problem with lack of compactness
SOFTWARE SURVEY SECTION	I	

Volume 13 Number 11

PHAM HUY DIEN and PHAM HUU SACH	1251	Further properties of the regularity of inclusion systems
F. PACARD	1269	Convergence of surfaces of prescribed mean curvature
N. S. PAPAGEORGIOU	1283	Relaxation of infinite dimensional control systems
HITOSHI ISHII and NAOKI YAMADA	1295	A remark on a system of inequalities with bilateral obstacles
CHIN-YUAN LIN	1303	Degenerate nonlinear parabolic boundary value problems
M. KWAPISZ	1317	On the error evaluation of approximate solutions of discrete equations
F. I. NJOKU and F. ZANOLIN	1329	Positive solutions for two-point BVP's: existence and multiplicity results
A. P. MORGAN and L. T. WATSON	1339	A globally convergent parallel algorithm for zeros of polynomial systems

HWAI-CHIUAN WANG 1351 The generalized Strauss compactness lemma and its applications on nonlinear elliptic problems

B. TANG 1359 On the existence of periodic solutions in the limited Explodator model for the Belousov–Zhabotinskii reaction

SOFTWARE SURVEY SECTION I

Volume 13 Number 12

M. G. CRANDALL and P. E. SOUGANIDIS 1375 On nonlinear equations of evolution

J. N. GLOVER 1393 Hopf bifurcations at infinity

S. CARL 1399 The monotone iterative technique for a parabolic boundary value problem with discontinuous nonlinearity

A. ACKER 1409 Uniqueness and monotonicity of solutions for the interior Bernoulli free boundary problem in the convex, n-dimensional case

B. LAFFERRIERE and W. V. PETRYSHYN 1427 New positive fixed point and eigenvalue results for P_γ-compact maps and some applications

B. SCARPELLINI 1441 A class of singular boundary value problems

N. KUTEV 1475 On the solvability of the Dirichlet problem for degenerate equations of Monge–Ampere type
